

Avalanche danger

Forecast through: 5.5.2026, 17:00 / Next update: 5.5.2026, 17:00

Wet snow, Gliding snow

The surface of the snowpack will freeze very little. As a consequence of warming during the day individual wet and gliding avalanches are possible, in particular on steep north facing slopes. Restraint should be exercised because avalanches can sweep people along and give rise to falls.

Danger levels

 1 low

 2 moderate

 3 considerable  4 high

 5 very high
