

Avalanche danger

Forecast through: 21.11.2024, 17:00 / Next update: 21.11.2024, 17:00

Wind slab

Avalanche prone locations

Danger description

Fresh and somewhat older wind slabs are to be evaluated with care and prudence. Mostly avalanches are small but in some cases easily released. The current avalanche situation calls for careful route selection.

Wet snow

Avalanche prone locations

Danger description

As a consequence of the rain more frequent moist snow slides are possible in the afternoon, especially on very steep grassy slopes.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
