

Avalanche danger

Forecast through: 12.2.2026, 17:00 / Next update: 12.2.2026, 08:00

Wind slab

Avalanche prone locations Danger description

As a consequence of new snow and a strong wind from westerly directions, sometimes avalanche prone wind slabs will form. Avalanches can reach medium size. The fresh wind slabs are to be evaluated with care and prudence in particular in very steep terrain.

Moderate (2)

Wet snow

Avalanche prone locations Danger description

Wet snow slides and avalanches are to be expected as a consequence of the rain, in particular on very steep slopes. These can reach medium size. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
