Avalanche prone locations Danger description

A generally favourable avalanche situation will prevail. Avalanches can in some places be released in near-surface layers by people. They can reach medium size. The avalanche prone locations are rare but are barely recognisable, even to the trained eye. Caution is to be exercised in particular on very steep shady slopes in little used backcountry terrain.

Low (1)

Gliding snow

In particular on steep sunny slopes individual gliding avalanches are possible below approximately 2400 m. Caution is to be exercised in areas with glide cracks.
