

Avalanche danger

Forecast through: 25.3.2026, 17:00 / Next update: 25.3.2026, 17:00

Wind slab

Avalanche prone locations Danger description

As a consequence of a strong to storm force westerly wind, sometimes avalanche prone wind slabs will form in the course of the day. The number and size of avalanche prone locations will increase. Single winter sport participants can release avalanches, including medium-sized ones. Backcountry touring and other off-piste activities call for careful route selection.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
