

Avalanche danger

Forecast through: 2.1.2026, 17:00 / Next update: 2.1.2026, 17:00

Persistent weak layers

Avalanche prone locations Danger description

Fresh and somewhat older wind slabs can in some cases be released easily. Mostly avalanches are small. Caution is to be exercised in particular in extremely steep terrain. Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
