

Avalanche danger

Forecast through: 29.4.2024, 17:00 / Next update: 29.4.2024, 17:00

New snow

Avalanche prone locations Danger description

The fresh snow and the sometimes large wind slabs represent the main danger. Single winter sport participants can release avalanches, including large ones. Backcountry touring calls for experience in the assessment of avalanche danger.

Moderate (2)

Wet snow

Avalanche prone locations Danger description

As a consequence of solar radiation more frequent small and medium-sized moist loose snow avalanches are to be expected. In the event of prolonged bright spells this applies in particular in the western and central parts of the main Alpine ridge.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
