### Danger description

The new snow and wind slabs of the last few days are in some cases still prone to triggering. Single winter sport participants can release avalanches. Mostly these are medium-sized. Backcountry touring calls for careful route selection.

## Moderate (2)

## Wet snow

### Avalanche prone locations

### Danger description

As a consequence of solar radiation more frequent small and medium-sized moist loose snow avalanches are to be expected. In the event of prolonged bright spells this applies in particular.
