

Avalanche danger

Forecast through: 22.12.2024, 17:00 / Next update: 22.12.2024, 08:00

Wind slab, Persistent weak layers

Avalanche prone locations Danger description

Thus far only a little snow is lying. The wind slabs of the last few days are lying on top of a weakly bonded old snowpack. They are small but can be released easily. These avalanche prone locations are to be found in particular in gullies and bowls. Apart from the danger of being buried, restraint should be exercised as well in view of the danger of avalanches sweeping people along and giving rise to falls.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
