

Avalanche danger

Forecast through: 27.12.2024, 17:00 / Next update: 27.12.2024, 08:00

Persistent weak layers

Avalanche prone locations Danger description

Thus far only a little snow is lying. The clearly visible wind slabs are lying on top of a weakly bonded old snowpack. They are mostly small and can only be released in isolated cases.

Apart from the danger of being buried, restraint should be exercised as well in view of the danger of avalanches sweeping people along and giving rise to falls.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
