

Avalanche danger

Forecast through: 29.11.2023, 17:00 / Next update: 29.11.2023, 17:00

Snow drift

Avalanche prone locations

Danger description

The wind slabs of the last few days are prone to triggering. Single winter sport participants can release avalanches, including medium-sized ones. Off-piste activities call for experience in the assessment of avalanche danger. The Avalanche Warning Service currently has only a small amount of information that has been collected in the field, so that the avalanche danger should be investigated especially thoroughly in the relevant locality.

Danger levels

 1 low

 2 moderate

 3 considerable  4 high

 5 very high
