

Avalanche danger

Forecast through: 29.4.2024, 17:00 / Next update: 29.4.2024, 17:00

Wind slab

Avalanche prone locations Danger description

The new snow and wind slabs are in some cases prone to triggering. Avalanches can in some places be released by people and reach medium size. Backcountry touring and other off-piste activities call for careful route selection.

Moderate (2)

Wet snow

Avalanche prone locations Danger description

As a consequence of solar radiation more frequent small and medium-sized moist loose snow avalanches are to be expected. In the event of prolonged bright spells this applies in particular in the western and central parts of the main Alpine ridge.

Danger levels

1 low

2 moderate

3 considerable

4 high

5 very high
