

Avalanche danger

Forecast through: 29.11.2023, 17:00 / Next update: 29.11.2023, 17:00

Snow drift

Only a little snow is lying. The more recent wind slabs are to be evaluated with care and prudence in particular in extremely steep terrain. Restraint should be exercised because avalanches can sweep people along and give rise to falls.

The Avalanche Warning Service currently has only a small amount of information that has been collected in the field, so that the avalanche danger should be investigated especially thoroughly in the relevant locality.

Danger levels

 1 low

 2 moderate

 3 considerable  4 high

 5 very high
